About Me

I'm Teddy, a Computer Engineering MSc student at Åbo Akademi University with planned graduation in 2026. In my bachelor's i've specialized in mathematics and in my Master's, in Computational Data Analytics with a strong interest in software engineering, data-driven systems, and signal processing.

I'm self-motivated, quick to learn, and I enjoy building real products end-to-end. I'm looking for opportunities where I can apply my technical skills in practical environments, contribute to a strong team, and grow into a high-impact engineer.

Skills/Stack

- Programming: TypeScript/JavaScript, Kotlin, Swift, Python, SQL.
- Dev & Tooling: Git, Docker, Linux, CI-friendly workflows.
- Signal Processing & Engineering: MATLAB / Simulink, Signal processing, Time-series analysis and feature extraction from sensor data, control systems

languages

Swedish

Experience

Full-stack developer

2025-current

QuickFix

As Full-stack developer, created the companies android and ios mobile application using Swift, Kotlin and implemented backend services.

Front-end developer

2021-2023 (summers)

Skipperi

Participated in the development and maintenance of the company's website, providing technical support and solutions. Programming mainly in typescript using WebAPIs. Fixed bugs, improved UX flows, and supported deployments.

Monitoring team

2025 (5 months)

Wolt

Monitored service health and operational stability using dashboards and alerting workflows. Investigated incidents, identified probable causes

Education

Åbo akademi Univerity

2021 - 2026

MSc Computer Engineering

Mathematics, machine learning, data engineering, automation/control, distributed systems/observability, signal processing, and system safety methods (STAMP/STPA).

Finnish Defence Forces 12-month conscript

2018-2019

NCO School, Coastal Jaeger Recon
